Office Action Summary

Application/Control Number: 10/047,523

Art Unit: 3652

1. Applicant's arguments filed September 4, 2002 have been fully considered but they are not deemed to be persuasive. Applicant's discussion of certain individual features of the several references is insufficient to show unobviousness where the rejection is based on a combination of the references (In re Young et al, 159 USPQ 725).

It is within the purview of 35 U.S.C. 103 to select features from the prior art to effect results expected from these features (In re Skoner et al, 186 USPQ 80). Moreover, in evaluating such references, it is proper to take into account not only the specific teachings of the references but also the inferences which one skilled in the art would reasonably be expected to draw therefrom (In re Preda 159 USPQ 342; In re Heldt 167 USPQ 676). The test for obviousness is not whether the feature of one reference may be bodily incorporated into the other to produce the claimed subject matter but simply what the combination of references makes obvious to one of ordinary skill in the pertinent art (In re Keller, 208 USPQ 871).

2. Determinations of obviousness take into account the collective teachings of the prior art and level of ordinary skill in the art. The claimed subject matter takes into account only knowledge which a person having ordinary skill in this art would find obvious with the references relied upon by the examiner (In re McLaughlin 170 USPQ 209). The issue of obviousness is not only determined by what the references expressly state but also is determined by what they would fairly suggest to those of ordinary skill in the art (In re Delisle 160 USPQ 806; In re Bozke 163 USPQ 545). It is noted that skill, not the converse, is presumed on the part of those practicing in the art

(In re Sovish 226 USPQ 771) and the conclusion of obviousness can be made from "common sense" of the person of ordinary skill in the art (In re Bozek 163 USPQ 545). Since the claimed subject matter would have been obvious from the references, it is immaterial that the references do not state the problem or advantage ascribed by applicant (In re Wiseman 201 USPQ 658).

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

5. Claims 1-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nilson in view of Fretwell et al, Corley, Jr. and Japanese Patent #457685. Nilson discloses a substantially similar lift system including parallel arms #24, #29 and support member #32. It is noted that using the lift for a wheelchair is merely intended use and does not structural define over the art (In re Sinex 135 USPQ 302; In re Pearson 181 USPQ 641). Fretwell et al discloses the use of a similar lift for a wheelchair. Nilson lacks an u-shaped bracket support. Corley, Jr. discloses an u-shaped bracket #35, #36

at the end of the parallel arms. It would have been obvious to a mechanic with ordinary skill in the art at the time the invention was made to substitute such a bracket if so desired. The motivation is the known use of equivalents. Japanese Patent #457685 discloses the use of an u-shaped bracket 43a, 43b between the ends of the parallel link (claim 10).

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Examiner Bratlie whose telephone number is (703) 308-2669. The examiner can normally be reached on Monday through Thursday from 6:30 to 5:00. Friday is the examiner's day off.
